Sign In App ®

The smart and safe way to sign in

Transforming safety in schools across the globe

# Flexible tools for safer schools

Visitor management

Employee and contractor sign in

Desk and meeting room booking
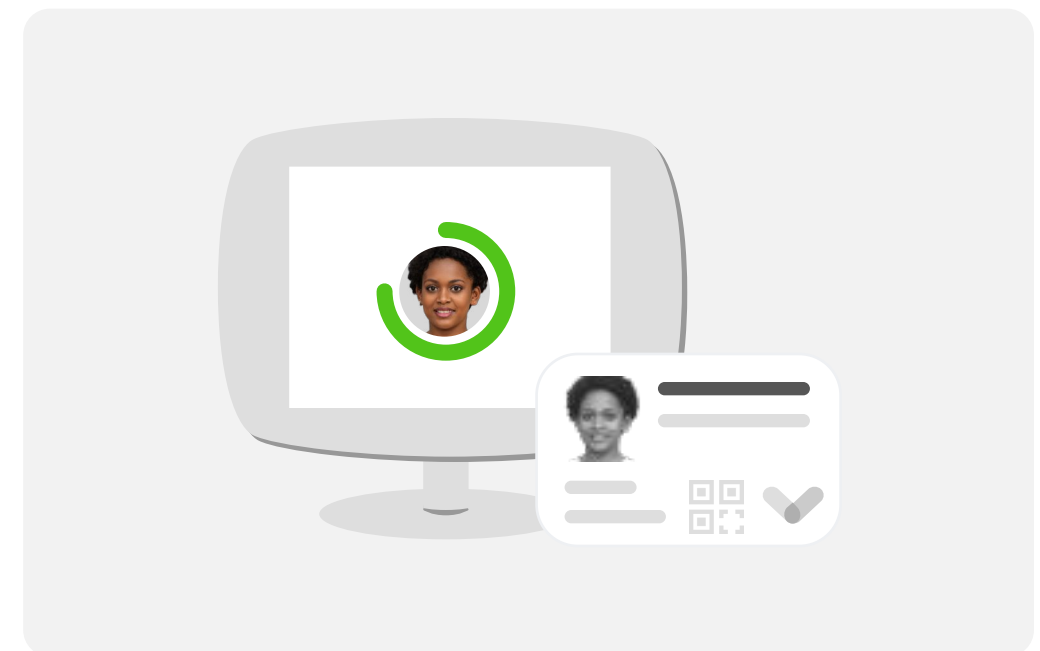

Safety✚ included as standard

Safety always comes first. We provide flexible tools to help our Sign In App community maintain safety for visitors, students and employees, included as standard.

Safe and secure visitor management

Have full control over who enters the building and get the insights you need to protect students, employees and visitors from any emergency.

> Screen every visitor

> Know exactly who is on site
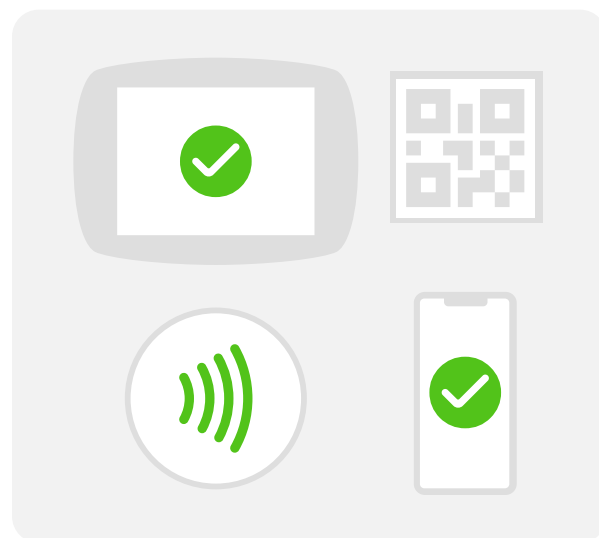

> Improve security with visitor badges

" Sign In App has improved the process we were using for signing in at each of our schools. Using the companion app has given some time back to our teachers. It's also nice to see an app to is continually developing and improving. I look forward to see some of the new features down the road. "

Blake Treadwell, Roanoke City Schools
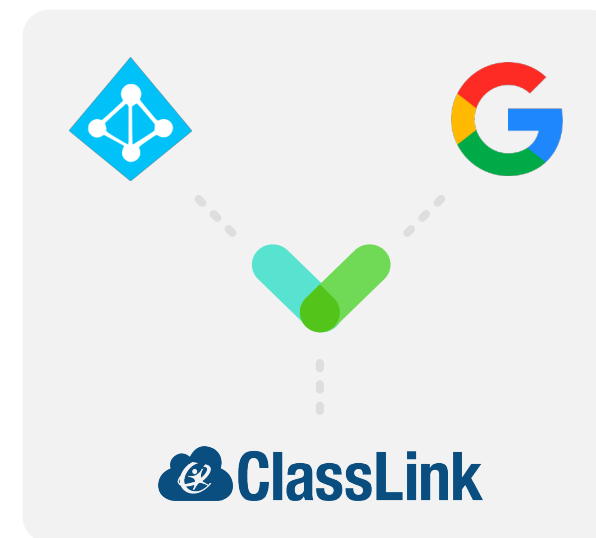

Employee and contractor sign in

Transform the employee sign in experience, measure staff attendance and hours and collect the information you need. Ensure safety, control access and keep a record of agreed terms and policies.

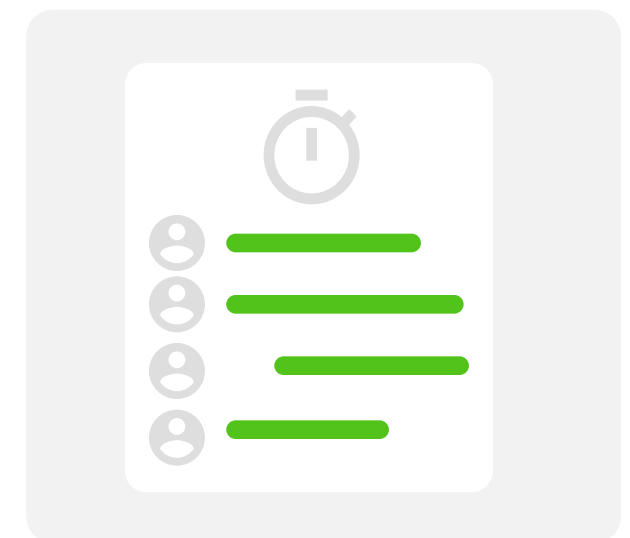

Sign in quickly from an iPad, smartphone, QR code or RFID
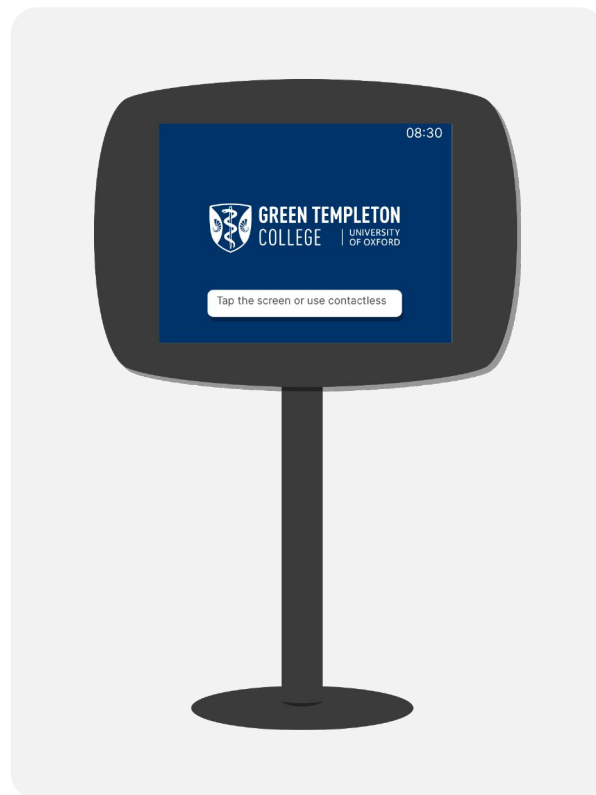

Allow employees to sign in on-site and remotely

Sync with Azure AD, Google Workspace and ClassLink

Produce timesheet reports and ensure employee safety

Configure Sign In App to suit your school
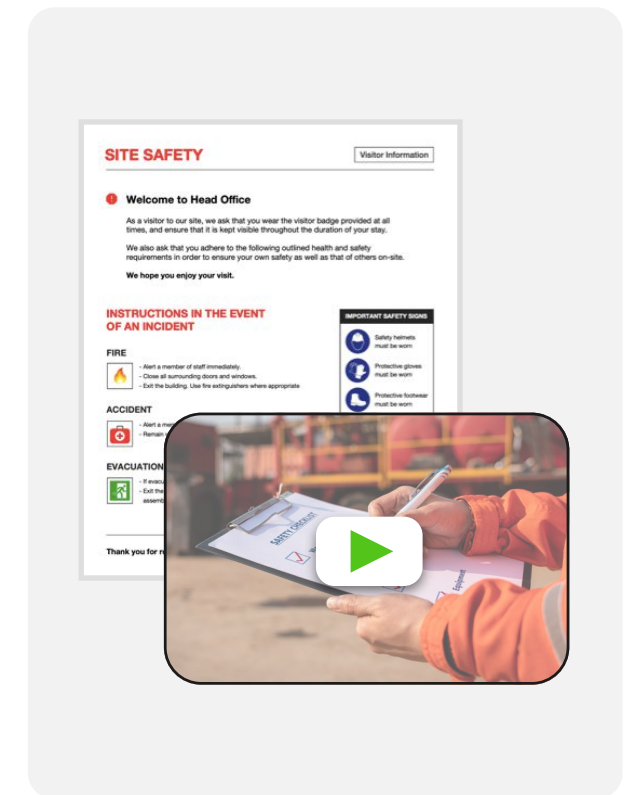

The sign in process can be customised for each group type to provide a streamlined experience.

Ensure visitors and staff read and accept important agreements and store securely in the online portal.

Add custom data fields and tailor them to each type of visitor to gather the data you need.

Share important information such as health & safety, safeguarding and privacy policies.

# Intelligent integrations with existing systemns

Intelligent connections with your existing systems makes it easy to keep your student and staff data in sync and always up-to-date.

- Sync with ClassLink
- Azure AD and Google Workspace
- Our notification tools can also hook into your Slack channels and MS Teams.

Always be prepared for emergencies

Ensuring your evacuation report is an accurate reflection of everyone on site is critically important. By signing everyone in via Sign In App, you will always have an accurate, real-time evacuation list on-hand when and where you need it, on any mobile device.
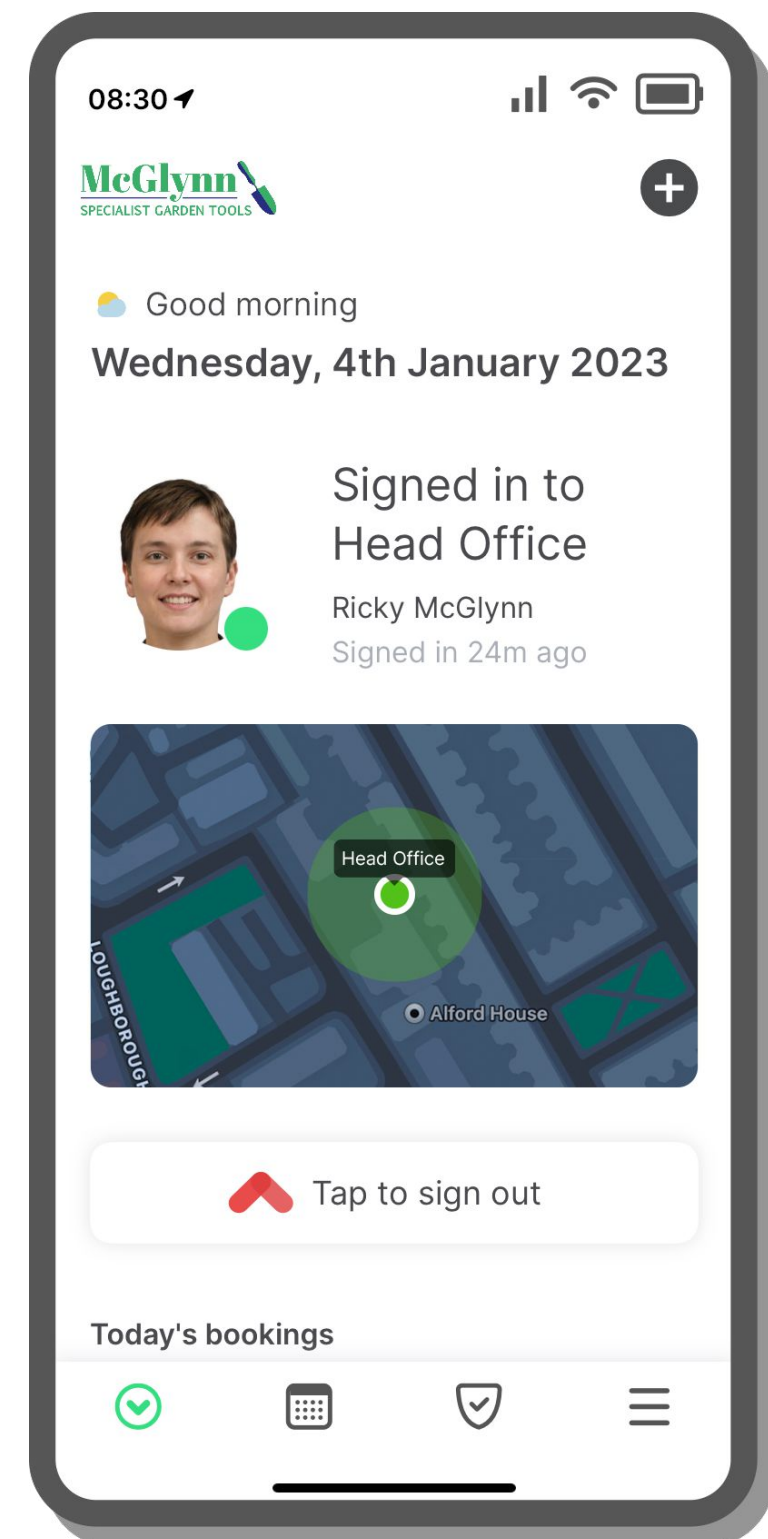

> Timed roll calls shared across devices

> Add comments in real time

> Manage multiple evacuation points

> Review past evacuations

> Filter by personal field

Free companion app for smartphones

Available on iPhone and Android. Enable your employees to sign in from anywhere straight from their smartphone. Sign in, join shared evacuation reports, pre-register guests and book desks & meeting rooms.

- Sign in on site or remotely
- Auto sign in when you arrive on site **BETA**
- Create and join shared evacuation reports
- Book desks and meeting rooms with Spaces
